

"I had the pleasure of working closely with BNETAL on the security aspects of a major EY initiative called Global Tax Platform (GTP), a cloud platform soon to be mission critical to EY. Throughout the project, BNETAL consistently provided thought leadership, and used their excellent subject matter expertise and communication skills to push the envelope of security. BNETAL contributions to GTP have been widely appreciated by GTP and EY leadership. I highly recommend BNETAL's enterprise and cloud security services!" — *Manager, EY Global Tax Platform*

BNETAL Highlights

Enterprise solutions for secure data exchange, EDI, healthcare IT, and security.

Industry leading expertise in security architecture, cloud infrastructures.

Trusted advisors to national level healthcare interoperability initiatives.

BACKGROUND

Based in Atlanta since 1996, we are seasoned professionals with decades of experience. Having successfully executed large projects such as EY's Global Tax Platform, CDC's Public Health Information Network, our solutions leverage our expertise gained in such projects in areas like cloud, security, health data exchange, interoperability and regulatory compliance. Our work over the years has earned us the reputation and trust of major clients.

VALUES

BNETAL's business core values include being client focused, diligent, respectful, having high integrity, being team focused, honest, friendly, trustworthy professionals.

MISSION

Providing value through our robust solutions and expert advisory services. Earning our client's trust by providing consistent and excellent services and solutions. Enabling our clients to stay focused on their core business competencies by being their technology partners.

SOLUTIONS

Our solutions empower our clients to address all aspects of secure data exchange, including data transport (SureDeliver®), processing (SureEDI®), security (ManageSecure®) and monitoring (SureVigil®). We realize that data exchange, EDI and security can be complex and expensive. Our solutions simplify these areas and make them more reliable, secure and affordable.

EXPERTISE

We offer a unique combination of expert services at the intersection of security architecture, interoperability standards, regulatory compliance, and cloud. We have deep domain knowledge in healthcare data exchange ranging from administrative, clinical, public health, pharmacy.

HOW WE WORK

BNETAL invests the time to obtain an in-depth understanding of our client's strategic and tactical objectives. When strategic and tactical objectives differ, we collaborate with business stakeholders on balancing these objectives. We then take on a hands-on approach to addressing client needs in all phases of the projects.
