Your Data is Your Crown Jewel. Use our Expertise to Protect it.

BNETAL Security Experience Highlights

- Thought leadership for NC DHHS’s cloud security strategic initiatives (AWS, Azure, GCP, Salesforce).
- Security and Thought Leadership for EY’s Global Tax Platform – a large cloud based platform using Azure PaaS and IaaS.
- BNETAL security resource management and secure data exchange solutions – Secure deployments to AWS and Azure cloud.
- Secure Implementation of BNETAL SureDeliver for ACA Compliance.
- Connectivity and Security Expertise to Council for Affordable Quality Healthcare for HIPAA EDI transactions.
- Security Architecture for HHS’s Nationwide Health Information Network.
- Security architecture, design, implementation for the first health and disease data transport system at CDC.
- Security resource management at Virginia Department of Health.
- Security assessment of Minnesota Department of Health’s Lab Information Management System.
- Secure data exchange consultations to Oregon Department of Health
- Security consulting to Arizona Health Information Exchange.

BNETAL: Enterprise and Cloud Security Experts

OUR APPROACH

BNETAL helps you secure your applications and data in the cloud. We assist you in your cloud migration, operation and security. A few key steps in which our services will be useful to your organization are listed

Business Analysis

- current and planned future business, infrastructure and application landscape
- criteria for risk categorization
- industry regulations and best practices
- organizational policies
- business size, risk tolerance

Security Policy Definition / Refinement

- infrastructure security policies
- application level security policies

Security Policy Gap Analysis

- legal, process, and technical gaps in meeting security policies
- impact of gaps in terms of risk

Security Control Implementation

- *solution options for infrastructure security; e.g.,*
 - ❖ firewalls/network isolation
 - ❖ patch level monitoring
 - ❖ intrusion detection
 - ❖ anti-virus and anti-malware monitoring
 - ❖ incident management and response
- *solution designs for application level security; e.g.,*
 - ❖ identity and access management
 - ❖ authentication & authorization
 - ❖ encryption (data at rest and in transit)
 - ❖ logging and monitoring
- cost-benefit analysis of solution options
- implementation support for security controls
- testing and certification

Management of Remaining Risks

- options and recommendations for bridging gaps
 - ❖ on-prem, in-cloud and hybrid strategies

Maintenance: Ongoing Security Conformance / Compliance

- assessment of technology upgrade options
- migration to newer and better technologies

BIG-4 CLIENT ENDORSEMENT:

“I had the pleasure of working closely with BNETAL on the security aspects of a major EY initiative called Global Tax Platform (GTP), a cloud platform soon to be mission critical to EY. Throughout the project, BNETAL consistently provided thought leadership, and used their excellent subject matter expertise and communication skills to push the envelope of security. BNETAL contributions to GTP have been widely appreciated by GTP and EY leadership. I highly recommend BNETAL’s enterprise and cloud security services.”

- *Manager, E&Y Global Tax Platform*
